

# CRUISING - THE SAFEST WAY TO TRAVEL

More people are cruising than ever before while operational incidents continue to decline

Cruise Capacity

From 2009-2018, the industry's capacity has grown by 55 percent.

During that same time, the overall number of operational incidents declined by 37 percent according to the data collected, and man overboard incidents declined by nearly 35 percent.\*

Operational Incidents

-37%

Rate\* of man overboard incidents

-35%
